

## " M U C K   O F F "

ANTISEPTIC, NON-ALKALINE, SOLVENT-FREE HAND CLEANING PASTE WITH DUAL ACTION

### DESCRIPTION:

"MUCK OFF" is a hand cleaning paste containing cleaning agents based on natural raw materials. Its dual action enables it to be employed with dilution, simply by massaging into the dirt and grease on the skin, continue rubbing while adding a little water, then rinse thoroughly.

### TECHNICAL DATA:

"MUCK OFF" is solvent free, which avoids residual solvent odours on the skin after use. The absence of solvents also eliminates problems of water pollution and possible adverse reaction with the skin. "MUCK OFF" contains no Formaldehyde and is non-Formaldehyd forming.

The active components of "MUCK OFF" are fully biodegradable.

Absence of alkalinity and careful formulation has led to the development of a mild product well tolerated by the skin. The excellent skin compatibility of "MUCK OFF" has been tested by the Skin Clinics of the University of Dusseldorf and Gottingen. (Results available on request)

"MUCK OFF" is economical: 3 grammes being sufficient in the majority of applications.

"MUCK OFF" is effective against a wide range of soils, including oils, fats, greases, paints, etc.

The presence of superfatting agents leads to a product which not only cleans but also protects the skin, a factor which is very important where constant contact with soils leads to frequent use of handcleaners.

### AVAILABILITY:

"MUCK OFF" is available in 3 kg and 9 kg. containers. Both containers can be fitted with dispensers.

### HEALTH & SAFETY:

Irritant to the eyes. In case of accidental contact irrigate well with warm water. If pain or redness persist seek medical attention.

In case of ingestion, rinse mouth well with warm water. This product is not considered toxic.

### CHEMICAL INGREDIENTS:

Coconut-fallow-alcohol-sulphate; Coconut diethanolamide; Lanolin; Plastic abrasive.
